

ZUO EN

Full-Stack Developer

CONTACT

Tianjin, China
wepndroid@gmail.com

POSITIONING

- Full-stack web and mobile apps
- Frontend, backend, and API delivery
- ReactVNext, Angular, Vue, PHP UI
- Flutter and React Native apps
- Cloud-ready product development

TECHNICAL STACK

Frontend: React, Next.js, Typescript, JavaScript, Angular, Vue, HTML5, CSS3, PHP
Mobile: Flutter, React Native, crossplatform app UI, mobile-first interfaces
Backend: Node.js, Express, Python, Go, FastAPI, Flask, gRPC, REST APIs
Data: PostgreSQL, MongoDB, Redis, API data modeling, admin systems
Cloud: Docker, Kubernetes, AWS, GCP, CI/CD, deployment workflows

SERVICES

- Web app development
- Mobile app development
- API and backend systems
- Admin dashboard builds
- MVP development and launch support

STRENGTHS

- End-to-end product thinking
- Clean reusable architecture
- Fast framework adaptation
- Reliable startup delivery

PRODUCT TYPES

- SaaS dashboards and portals
- E-commerce and marketplaces
- Mobile-first MVP products
- Business workflow systems
- Admin and reporting tools

ZuoEn

Full-Stack Developer | Web Apps, Mobile Apps, APIs & Cloud-Ready Products

PROFESSIONAL SUMMARY

Full-Stack Web and Mobile Developer specializing in production-ready web platforms, cross-platform mobile apps, backend APIs, and cloud-ready product systems. Experienced across React, Next.js, Angular, Vue, PHP, Flutter, React Native, Node.js, Python, Go, relational and NoSQL databases, and modern deployment workflows. Strong focus on clean architecture, responsive UI, reliable API integration, maintainable code, and practical product delivery for startups and digital product teams.

Web Platforms

React, Next.js, Angular, Vue, Typescript, PHP-integrated systems

Mobile Applications

Flutter, React Native, cross-platform flows, app UI and integrations

Backend & APIs

Node.js, Python, Go, REST/gRPC services, auth and business logic

Cloud Delivery

Docker, Kubernetes, AWS/GCP, CI/CD, database-backed deployments

PROFESSIONAL EXPERIENCE

Beijing Matai Software Development Co., Ltd. | Dec 2024 - Dec 2025

Senior Full-Stack Web & Mobile Developer

- Delivered full-stack web and mobile product features across user interfaces, backend APIs, data flows, authentication, and release-ready application workflows.
- Built maintainable frontend screens and API-connected backend services for business platforms, e-commerce flows, dashboards, and mobile app experiences.
- Improved product usability, responsive behavior, service structure, deployment readiness, and cross-team handoff quality for client-facing systems.

Suzhou Zhuryn Software Development Co., Ltd. | Aug 2022 - Jul 2024

Full-Stack Web & Mobile Developer

- Developed web and mobile applications from product design through implementation, including reusable UI components, backend endpoints, database-connected features, and testing support.
- Integrated REST/GraphQL APIs, authentication flows, forms, admin dashboards, mobile screens, and third-party services with clear code structure and practical maintainability.

Hunan Piizu Network Technology Co., Ltd. | Apr 2020 - Mar 2022

Full-Stack Developer, Web & Mobile Products

- Built responsive web platforms and mobile app features for business systems, combining frontend implementation, backend API work, database operations, and product iteration support.
- Supported custom software, mobile, web, and IoT-related application workflows by connecting UI screens, server logic, data handling, and deployment tasks.

DELIVERABLES

WebApps	Mobile Apps	Backend Systems
responsive SaaS, dashboards, portals, admin systems	Flutter/React Native apps with API-connected flows	APIs, auth, databases, deployment and maintenance

EDUCATION

Taiyuan University of Science and Technology | 2015- 2019

Bachelor of Computer Science and Technology

BEST-FIT PROJECT TYPES

SaaS & Admin Dashboards data-heavy UI, permissions, charts, filters, forms, reports	Web+ Mobile MVPs shared product logic across website, app, API, and database
E-commerce & Marketplaces catalogs, checkout, user accounts, payments, order flows	System Modernization frontend refactor, API cleanup, database and deployment improvement

WORKING APPROACH

- Clarify target users, platform scope, mobile requirements, backend/API status, database needs, integrations, deployment target, and release priorities before implementation.
- Design practical architecture with reusable UI components, clean API boundaries, predictable data models, secure authentication, and maintainable project structure.
- Deliver product features that are visually polished, stable, responsive, API-ready, deployment-ready, and easy for client teams to extend after launch.

FULL-STACK DELIVERY COVERAGE

Product Architecture frontend screens, mobile flows, APIs, database design, auth, roles, and deployment structure	Release Quality responsive QA, app usability, integration testing, performance cleanup, and post-launch support
